

brioxAL[®]

High-Gloss Aluminium

For Sophisticated Interior
and Façade Design

brioxAL® – Aluminium in Its Most Refined Form

More than just metal: **brioxAL®** by Hartmann stands for pure elegance and timeless aesthetics. Its high-gloss surface captures light, colour, and space—transforming them into a captivating interplay of reflection and movement. Almost mirrorlike, yet with soft, flowing contours that present architecture with a subtle, dynamic depth.

Authentic. Vibrant. Unique.

Surface

Pure, uncoated aluminium—high-gloss, without lacquer or coating. The natural metal structure remains visible, creating depth, brilliance, and dynamic reflections. Each panel is unique, bearing fine traces of fabrication.

Colours

● Transparent Silver ● Gold ● Titanium ● Brass ● Black Metallic

Anodising in its most refined form: all variants retain the characteristic metallic sheen—pure and authentic.

Application

Space for reflection—indoors and outdoors. **brioxAL®** is ideal for:

- Façades with specific light effects
- Interior spaces requiring a strong architectural statement
- Museums & galleries
- Reception & exhibition areas
- Design objects & artistic metal cladding

Processing

Flexible and precise—**brioxAL®** can be cut, punched, milled, or bent to specification. Following fabrication, the material is anodised in the desired colour while retaining its brilliant high-gloss appearance.

Product Range

- Thickness: 3 mm
 - Width: 1.500 mm
 - Lengths: 3.000 mm and 4.000 mm – available from stock
- (Additional formats available on request)

Sustainability & Safety

100 % pure aluminium—no coatings, no composites, fully recyclable. **brioxAL®** is durable, weather-resistant, and non-combustible (A1). It combines aesthetic perfection with ecological responsibility—for architecture that lasts.
